

INSTANT HYDRATION SERUM HIGHLY EFFECTIVE HYDRATION

Instant Hydration Serum has been specially formulated to improve the hydration of different layers of the skin. The intensive effect is made possible by the combination of two hyaluronic acids with different molecular weights.

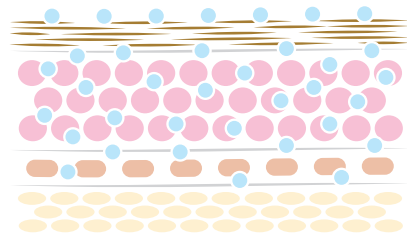

Hyaluronic acid is a true anti-aging miracle. Their water-binding capacity counteracts age-related dryness and surface roughness of the skin. In order to achieve a good hydration effect with a hyaluronic acid product, the molecular size, i.e. the chain length, of the hyaluronic acid is crucial: Hyaluronic acid with a molecular weight of 30 to 50 kilodaltons penetrates deeply and thus moisturizes the entire dermis. Hyaluronic acid with a molecular weight from 50 kilodaltons enables a good supply of the stratum corneum.^{14 15}

Apply a thin layer of the serum to the face, neck and décolleté with light circular movements applied. The absorption of the product can be supported by a light tapping

finger massage. Then Instant Teint Love, Instant Eyes Love and / or Instant Wrinkle Eraser can be applied: For wrinkle-free, flawless and radiant skin.

High-molecular hyaluronic acid remains on the stratum corneum.

Low-molecular hyaluronic acid penetrates deep into the dermis.
